

PRODUCT INFO SHEET

10MTR ACTIVE OPTICAL HDMI

Our 10-Metre Active Optical HDMI Cable is the perfect solution for seamless and highquality audiovisual connectivity over extended distances. This advanced cable harnesses cutting-edge optical fiber technology to transmit pristine 4K Ultra HD and 3D video, ensuring vivid and lifelike images without any signal degradation or loss. With an impressive bandwidth capacity of 18 Gbps, it supports smooth and lag-free content streaming, making it ideal for gaming, home theaters, presentations, and professional setups. The active technology within the cable boosts the signal strength, enabling reliable performance even across longer distances. Additionally, this cable supports enhanced audio formats, including Dolby TrueHD and DTS-HD Master Audio, delivering immersive and crystal-clear sound. The durable and slim design makes installation effortless, and its versatility ensures compatibility with a wide range of devices, from TVs and projectors to gaming consoles and computers. Upgrade your entertainment experience with our 10-metre Active Optical HDMI Cable and enjoy unparalleled audiovisual excellence.

- 18 Gbps
- High speed with Ethernet
- Supports 4k@60hz
- Directional Cable (Display/Source)
- Supports YUV4:4:4
- High dynamic range
- Optimized audio performance
